Financial & Customer Verification Note:

Revenue Integrity & Validation: The gross revenue metrics specified above represent direct, offline B2B license activations of the Crown Services system within our regional SME market (specifically tailored for automotive spare parts networks and multi-branch retail shops). Active accounts are managed through local license provisioning tracking codes stored natively in our Cloud SQL database instance (crown-services-last-project-db).

Zero Marketing Cost Spend Verification: Customer acquisition spend during the 90-day cycle is exactly **\$0.00**. Growth was achieved purely through zero-cost organic word-of-mouth channels, operational specialist networking, and showcasing live Next.js high-performance UI dashboards directly to early-adopter businesses facing acute multi-branch inventory losses. This directly certifies our exceptional business sustainability and clear path to explosive profitability.
